

Little Hope Creek Wastewater Improvement Project

**You're invited to attend a
virtual community meeting**

You're invited to a virtual public meeting to learn more about upcoming wastewater improvements in your area.

Charlotte Water is finishing the design of the Little Hope Creek Wastewater Improvement Project and will begin construction in the coming months. Once completed, the project will enhance the wastewater system in the community and protect the water quality in the creek.

This public information meeting is for residents and businesses in the Little Hope Creek basin, primarily in the Sedgefield and Madison Park neighborhoods. During the virtual presentation, project representatives will share more details about the wastewater system capacity needs, proposed plans and construction activities. Participants will be able to submit questions prior to and during the WebEx Event, which will be addressed in the meeting's live Q&A.

VIRTUAL PUBLIC MEETING

Tuesday, August 18, from 5-6:30 PM

To register and for more information on this project, please visit the project webpage at bit.ly/LittleHopeCreek or by visiting charlottewater.org (click on "projects"). If you're unable to attend the meeting, a recording will be added to the webpage for playback. If you have questions, please contact Charlotte Water project manager Stephen Scott at stephen.scott@charlottenc.gov or at 980-219-9488.
